

SmarterControls4Smartsheet – Smarter Project Initialiser

Who would like a structured way to start every Project within the organisation using more than just a template?

Our **Smarter Project Initialiser** feature available within our **SmarterControls4Smartsheet** is the very answer you've been looking for.

Initiation of New Complex projects along with naming conventions and placement of the new Project assets into designated Workspaces.

Are you...?

- ? Relying on individuals to create Project workspaces?
- ? Experiencing random/inconsistent column naming or report/dashboard creation?
- ? Sure all your Project Manager's understand YOUR way of documenting % Allocation or % Complete?
- ? Certain the right people being shared to the sheets?
- ? Able to easily report on **all** your Projects giving a consolidated view of your whole programme?

How does Smarter Project Initialiser help with these issues?

Part of our **Front end Platform**, which sees **SmarterControls4Smartsheet** at the core, this feature provides an end user wizard which eases the creation of new Projects.

The front end feature is designed to allow the end user to

- ✓ Select the correct corporate Project Workspace Template, consisting of multiple Project Sheets with all settings pre-set, rules already in place and Reports configured
- ✓ Cascade through the Smartsheet items naming the sheets and reports logically
- ✓ Place the newly created items all under a workspace and ensure the right users are being shared with the right permissions

Using this feature will save time but more importantly helps maintain corporate structure and uniformity which is a MUST for effective reporting and clear accurate dashboards.

Repeated Query from the Smartsheet Community

"How can I create a Template Set?"

Voila – Smarter Project Initialiser is the answer
