

Smarter Vaccination Bookings

Being used in Covid-19 vaccination clinics right now!

“We need an appointment booking system for a vaccination clinic. The system needs to be able to offer real-time appointment availability and manage two bookings at a time, the second date being a set number of days after the first appointment. This system needs to be able to cope with thousands of bookings a day. Can you do this?” Yes, we can!

Smarter Business Processes have written and released **Smarter Bookings** to meet the scenario above. It is already being used in Covid-19 vaccination clinics successfully. If you need a booking system in a hurry then this is your answer. **Smarter Bookings** is shelf ready and can be deployed to your environment within as little as 2 days of receiving the order, depending on how many adjustments you require.
